About the *Application Comparison* Dashboard

The *Application Comparison* dashboard displays on the first page when you log on to Unite. As illustrated in the picture below, the *Application Comparison* dashboard provides insights related to decisions and current statuses for applications in the current admissions cycle.

The dashboard interface includes a navigation bar with options: HOME, PEOPLE, APPLICATIONS, REVIEWS, REPORTS, UTILITIES, EVENTS, and JOURNEYS. The main content area is titled "Application Comparison" and features several data visualization components:

The eight tiles that are pinned on the *Application Comparison* dashboard provide current day numbers along with a year-over-year comparison (up to 5 years to the previous day). The following table provides a description of each tile on the dashboard.

Tile	Description
Export Decision	This tile contains a table that shows the number of applications for each of the export decisions over the previous five years.
Status/Substatus	This tile contains a table that shows the number of applications for each status and substatus combination as of the current day. You can also see a total for the number of open applications in Unite.
Current Status	This tile contains a table that shows the number of applications for each current status over the previous four years.
Decision	This tile contains a table that shows the number of applications for each decision status over the previous four years.
Ethnicity	This tile contains a bar graph that shows the number of applications by ethnicity over the previous five years.
Gender Identity	This tile contains a bar graph that shows the number of applications by the gender with which applicants identify over the previous five years.
LSAT / GPA	This tile contains a table that shows the 25 th , 50 th , and 75 th percentile for both LSAT and GPA.
Applications by High LSAT	This tile contains a line graph that shows the distribution of high LSAT scores across all applications over the previous five years.

The tiles on the dashboard are interactive. For example, when you hover your mouse pointer over a tile, a tile action menu displays that provides options for you to sort, filter, and focus on

the information. Depending on the tile, all or only a few options illustrated in the picture below may be available.
